CAREER OBJECTIVE

As a final-year student majoring in Software Engineering, I am eager to apply for the position of Java Web Developer Intern to enhance my programming skills and gain hands-on experience with professional software development processes. With a proactive learning attitude, strong sense of responsibility and a growth mindset, I aspire to contribute real value to the company's projects and grow alongside the sustainable development of the organization.

| Software Engineer

PROJECTS

Fertilizer Management Application

- **Objective:** Built a web application to support fertilizer inventory management, stock tracking and distribution.
- **Technologies:** Java Spring MVC, Hibernate, SQL Server.
- **Role:** Back-end developer, designed and managed the database.
- **Outcome:** Delivered an application enabling management of fertilizer product catalogs and inventory quantities, supporting small-scale traders.

Website Event Ticket Sales (In Progress)

- **Objective:** Developed a web-based platform that allows users to browse and purchase tickets for various events (concerts, seminars, sports,...), while enabling administrators to manage events, ticket inventory and participant information.

Techonologies Used:

- **Backend:** Java Spring Boot, RESTful API
- **Database:** PostgreSQL, Flyway (for schema migration and version control)
- **Caching:** Redis Cache (to optimize data retrieval and reduce database load)
- **Message Queue:** Apache Kafka
- **Deployment:** Docker.
